**NURSERY  
SOIL  
WOOD  
COAL**

Heading into Autumn, with days shortening and heavy dews to benefit gardens and lawns. My garden is tired now, so cutting back is the only way to smarten things up and get plants and Shrubs to push new growth and colour out. Petunias and Begonias are loving the warmth and will keep flowering if dead headed often. I have many new seedlings to plant out. Once gardens are trimmed back and cleared of annual weeds, I cut back what is there flowering and add the annuals that will take over once those flowering now are pulled out. Stock, Statice, Snapdragon, Wallflower, and Iceland Poppies are my fillers. I am still collecting and storing seed on dry days - have managed to collect a great stock of Lavatera and Delphinium seed. The Lavatera I will save until Spring, but the Delphinium has been sown and once up, will sit making strong roots until planted out in Spring.

**Roses:** Keep the Rose dead-heading up to encourage the last blooms of Summer - it is 6 weeks from a prune to another bud, which will take us into April. After that flowering, it is best to not dead-head - leave blooms to make seed, which will help to harden wood for the Winter ahead. Pruning and feeding then will encourage new soft growth - so no feeding from now on either.

**Compost:** I got a bit desperate for potting mix while potting up, so have been adding compost to the peat mix - my ready heaps are being emptied to make room for all the leaves to come. The other heaps are breaking down well with the heat and rain - I need to add manure and a little lime now while they are cooking.

March is definitely a great planting month. With the soil warm and the nights and mornings cooler, newly planted trees and Shrubs settle in well. There are a lot of well grown trees, Shrubs and plants on offer right now in Garden centres, ready and waiting to be planted. Gardeners further inland, will need to read the labels to establish frost ratings before buying - if in doubt wait until Spring.

**Spring bulbs:** Keep planting and dividing large clumps. Please bring any surplus bulbs into the Garden corner at the Recycling Centre to share with others. Clumps tend to double in size without you noticing and in no time a garden bed can become choked, looking attractive only in Spring, but dull for the rest of the year. I have often been asked the reason for Spring bulbs not flowering after the first couple of years from planting. The problem can be overcrowding, lack of adequate light as trees become larger and throw more shade during Summer, but the most common problem is bulbs may not have not been planted deep enough. Spring bulbs need to be planted 4 to 6 inches deep - that's 4 to 6 inches on top of the bulb. If not planted deeply, eventually when they do come into leaf and experience a dry patch during this time, they wont take up enough moisture to come into bud..

**Herbs:** This will be the last month to cut fresh Herb growth for drying and using throughout Winter. If Herbs were cut back before making seed, fresh new growth should be ready to cut. I cut Rosemary, Lemon Balm, Bergamot, Bay, Basil, Borage, Chives, Dill, Lemongrass, Mint, Oregano, Sage, Savory, Tarragon and Thyme, which are bunched and hung or laid out on newspaper in a dry well aired place to become dry and crunchy, before rubbing and storing in glass jars. These Herbs can be frozen as well.

**Lawns:** After those baking hot days and a lot of mowing, lawn growth starts slowing down from now on, although catchers will still be filling up for a while yet - but don't feel you need to cut lower than usual because growth has slowed - a scalped lawn dries out faster and encourages weeds. This is still the best time to sow new lawns while weed growth is slowing - the flat weeds I pop out with the blade of secateurs before they seed and spread.

**Fruit:** Late Peaches, Nectarines, Quince and Apples are ripe now and there are so many ways to use fresh Apples. Black sauce ( just like the bought one) - have just made some, <https://www.instructables.com/id/Chilli-Worcestershire-Sauce/> stewed Apple, Apple Jelly, Apple and Quince Jelly, Apple Pies, Apple Sponge, Apple Shortcake. Or just pick them, peel them and freeze them - or the birds will get them...

Vegetable Gardens will be growing new crops for the cooler seasons. Leaf veg should not bolt so readily now and will not mind the days getting shorter and cooling and root veg seeds will germinate well while the ground is still warm. Second sowing of Peas will be up, Corn is picked and the Pumpkins have outgrown their space and just keep going. Pumpkins can be picked before the first frost. Onions can be lifted once leaves have bent over - don't bend or damage leaves before they are ready to bend naturally, if you want them to store and keep well. Once dug, lay them out in a warm place to fully ripen, then store in a cool place. Root veg seed should germinate quickly in warm/moist Autumn soil. Cheers Linda

## Let's talk about COVID-19

COVID-19 is a new illness that can affect your lungs and airways. It's caused by a type of coronavirus. There are simple steps you can take to protect you and your family/whānau. The symptoms of COVID-19 are: a cough, a high temperature (at least 38°C), shortness of breath.

These symptoms do not necessarily mean you have COVID-19. The symptoms are similar to other illnesses that are much more common, such as cold and flu. Shortness of breath is a sign of possible pneumonia and requires immediate medical attention. We don't yet know how long symptoms take to show after a person has been infected, but current World Health Organization assessments suggest that it is 2–10 days. If you have these symptoms and **have recently been to a country or area of concern, or have been in close contact with someone confirmed with COVID-19**, please telephone Healthline (for free) on 0800 358 5453 or your doctor immediately.

COVID-19, like the flu, can be spread from person to person. When a person who has COVID-19 coughs, sneezes or talks, they may spread droplets containing the virus a short distance, which quickly settle on surrounding surfaces. You may get infected by the virus if you touch those surfaces or objects and then touch your mouth, nose or eyes. That's why it's really important to use good hygiene, regularly wash and thoroughly dry your hands, and use good cough etiquette.

**Prevention – how to protect yourself and others:** Cough or sneeze into your elbow or by covering your mouth and nose with tissues. Put used tissues in the bin or a bag immediately. Wash your hands with soap and water often (for at least 20 seconds). Try to avoid close contact with people who are unwell. Don't touch your eyes, nose or mouth if your hands are not clean. Avoid personal contact, such as kissing, sharing cups or food with sick people. Clean and disinfect frequently touched surfaces and objects, such as doorknobs. Stay home if you feel unwell.

· Call Healthline on 0800 358 5453 if you have any symptoms and have been to any countries or territories of concern or have been in close contact with someone confirmed with COVID-19.

## Motoring with Renee

Hi! Renee here, Sales Manager for North Otago Motor Group. This weeks 4x4 is a 2015 Toyota Hilux SR5 manual, the last of the old shape with the 3 litre turbo engine. This Hilux is ready for its new owner as it comes with a towbar, alloy bullbar, chrome bonnet protector, chrome handle scuff plates and deck liner, 4 new tyres, the SR5 has all you need dual range 4WD, SAT-Nav and reverse camera. Perfect smart looking upgrade in black, However if black is not the colour for you, we have the same in white for \$34,995 without the bullbar and less K's. We have over 35 years LOCAL experience in the industry and our team, Jamie, Martin and myself are here to help you. Being local has huge advantages for you. We are close to where you live; you can pop in and see us or we can come to you - plus we have a service and parts department.

Renee

See us any day including Saturday 9am-12, or call us to make an appointment outside working hours. Loads of options of vehicles too, from small run-bouts, SUV's to 4x4's. Plus we can cover everything from finance, insurance and extended warranties. Have a great week. Follow me on facebook.

## RealFood Pantry - Apple Cider

- 1.5kg apples
- (cooking apples if possible)
- 6 litres of water boiled and cooled
- 1Kg white sugar Sterilized Plastic screw top bottles
- Juice and finely grated zest of 3 lemons

### Method

1. Place apples in a tied plastic bag and place in the freezer for 3 days.
2. After 3 days thaw out the apples, chop into pieces including the cores, stalks etc and wizz in a blender or food processor.
3. Put the wizzed apple pulp in a clean `10 liter plastic bucket and add the boiled cooled water. Cover with a tea towel or muslin and leave for 7 days, making sure you stir the fluid every morning and evening.
4. After 7 days strain through a muslin, discard the pulp and pour the juice back into the bucket.
5. Add sugar, lemon zest and strained lemon juice.
6. Recover with a clean cloth, after a day the mixture will start fizzing as the natural yeast in the apples starts to convert the sugar into alcohol.
7. Wait a couple of days for the fizzing to die down, strain once again through a muslin and pour strained liquid into clean plastic screw cap bottles.
8. Resist the temptation for approx 1 week, after which time your Cider will be ready to enjoy!

## NORTH OTAGO MUSEUM

### The Oamaru Baptist Church

Severn Street was built in 1889 as a permanent place of worship for the Oamaru Baptist congregation. Mr Gideon Rutherford generously donated the land at section 4, block 25,

Oamaru Town along with a contribution towards the construction of the Church. The balance of construction funds were raised by the congregation and the Church opened on 14 July 1889 with the Baptist community largely free of debt. The total cost of the Church construction and land was L775 (\$164,000 today).

The Severn Street Baptist Church was tendered for by Edwin William Hardy who is likely to be the architect. Among other buildings in and around North Otago Edwin Hardy designed the first wooden Presbyterian Church at Maheno, Delargy's Hall at Kurow, Waddell's General Drapery at Kurow.

Edwin Hardy was born at Middlesex, England and arrived in New Zealand aged 8. He was the son of prominent early Oamaru citizen, civil engineer, surveyor and architect John Hardy. The family lived and farmed at Tokomairiro before moving to Oamaru. Edwin Hardy published some interesting reminiscence of his early life to New Zealand and his association with Gabriel Read in the Otago Daily Times in 1922. Hardy began to tender for construction projects in Oamaru from early January 1883. He married Anna Elizabeth Erentz on 10 November 1885 at St Paul's Church Oamaru and they had five children together. By 1896 Hardy was living in Kurow and working as a builder. Edwin Hardy died on 30 May 1929 at age 84 in Kurow and is buried at the Oamaru Cemetery.

Masonry work on the Baptist Church was completed by Tempero and Hossack for a tender of L275 (\$58,000 today). John Sinclair undertook the woodwork, painting, varnishing, gas fitting and

fencing for a tender of L320 (\$68,000 today). The original flooring was inclined to give a better view of the pastor to those at the rear. It took three months to complete construction of the Church. The Church was 64 feet long and 32 feet wide and was capable of seating 300 people. The design was of a puritanical simplicity, ornamentation was spared in favour of a functional and comfortable space to worship.

Over the years the Church had many improvements, by 1957 a manse was built in Eden Street. The Reverend Gordon Jackson oversaw the construction of a youth hall, minister's rooms, lounge, kitchen, infant room and toilet facilities during his time as minister between 1957 and 1963.

The Church was the focus of Baptist worship in Oamaru for 123 years. Numerous weddings, funerals, Sunday schools, choir practices and gatherings were held there over the years. The Church was sold by the Oamaru Baptist congregation in 2012 after it was found to be an earthquake risk. The Oamaru Baptist congregation moved to a new site, the former Ideal Services (IHC) property in Sandringham Street. The new site provided considerably more facilities, better parking and access, and room for more activities in the future, particularly day-based community programmes.

After standing for 130 years the Oamaru Baptist Church, Severn Street was demolished on 12 February 2020 to make way for a Trust Power customer service center.

### Worldwide Push to Stop 5G

Recently, the government of Switzerland banned the rollout of 5G. So did Brussels, Glastonbury, and 14 Italian municipalities including Rome. Many more communities and governments worldwide have either limited the rollout, or officially called for further research into the health and safety effects 5G technology. Why?

Over 10,000 scientific, peer-reviewed studies have shown that radio frequency (RF) radiation from our current technology (4G and below) causes a wide variety of harmful effects to human health, including cancers, heart disease, learning and memory deficits, and DNA damage. They also show harm to plant and animal life, including forests, trees, birds, frogs and bees. 5G technology could be much more harmful, because it will be more intense and unavoidable. There have been NO independent safety studies done on 5G, so its effects are unknown. The International Appeal to Stop 5G on Earth and in Space (known as the 5G Space Appeal), a petition to the UN with over 200,000 signatories from 203 nations and territories, calls the deployment of this technology "an experiment on humanity and the environment that is defined as a crime under international law." Please read the appeal at: [www.5gspaceappeal.org/the-appeal](http://www.5gspaceappeal.org/the-appeal)

## Havenwyck Pets

### Not all fish come with chips.....

We are often asked about getting a goldfish and using the age-old bowl to house said fish, luckily for the fish keeping world we have expanded our knowledge and can now provide a much healthier way to keep our fish. It is also key to know our animal welfare code includes Fish keeping!

Did you know the humble goldfish will grow up to 25cm and can live over 15 years!

We pride ourselves in ensuring your fish will live a long happy life, Goldfish are best kept in 70+ litre tanks. You can however choose some amazing tropical fish for smaller tank choices.

Cleaning and keeping fish are all the same no matter if you choose tropical or cold water, the only difference is a heater!! Weekly water changes, gravel siphon and a good quality filter are essential for keeping your tank healthy and your fish happy.

We offer Water testing in store for new and established tanks. We have a loyalty scheme, this entitles you to your fifth test being free!

*Come in and see me at Havenwyck Pets to discuss and find the best pet for you! Leanne Wreakes-Fallen. Dip.VN*
