## LINDSAY WHYTE

**Painters and Decorators Ltd**  
50 Years Experience Master Painter  
**FREE PHONE 0800 242 8611**

After needing so much more Pea Straw and readers of the Telegram wanting some - and our advertisers are all out of stock for the season.... I have been searching high and low and have found a local supplier. If you are after some Pea Straw for your garden, give Simon a call to help raise money for Oamaru Athletics - call 027 223 5274.

www.shopoamaru.co.nz is doing well - with 29 local businesses now registered and some already selling products. With Winter here, I would love to see even more businesses & products online for you to browse. A reminder.... this is a FREE service for all local businesses.

*Enjoy your week, regards The Telegram.*

Here we are now in June and frosts are here with lovely bright sun filled days to follow, putting a glow on the end of Autumn.

The mild days have encouraged another batch of weeds - hoeing while small will deal to them until heavy frosts arrive and stop growth.

We have some lovely Autumn flowering Sasanqua Camellias putting on a show - it almost seems wrong with every plant nearby shutting down for Winter. You will probably see these lovely flowering Camellias on offer in Garden Centres - the perfect Shrub to add interest to a garden in late Autumn early Winter. **Roses:** I picked the last bunch of Summer Roses this week - we need some hard frosts now to harden stems and take care of fungus and bugs. Later in the month I will spray Lime Sulphur first, which defoliates bushes then after pruning in July, will spray Champion Copper and Conqueror Oil. New season's bare rooted Roses arrive early in Garden Centres these days. If planting, prepare the ground by digging in old stable manure or bagged Rose mix. If planting a Rose in the same place a Rose has been growing, you will need to remove most of the soil and replace with soil from another part of the garden - disease is transferred very quickly from one Rose to another.

**Paeony Rose tubers** need to be planted now before the coldest months. If you must shift or divide established Paeonies, this is the time. Paeonies do not respond well to transplanting, but if planted well, will require little maintenance. Choose the location wisely - full sun, shelter from strong winds, away from trees or Shrubs competing for food and moisture. Plant with eyes up (new shoot) in deep, fertile, humus-rich moist soil that drains, well spaced 3 to 4 feet apart about 2 feet deep and 2 feet wide.

**New season bare rooted trees will be arriving in Garden Centres soon... I will list a few worth selecting below with sizing.**

**For large gardens:** Fraxinus (Ash) deciduous fast growing attractive shade trees 5m high in 5 years, (est) height 30 m. Golden Ash / Claret Ash and pendulous weeping Ash.

**Fagus (English Beech):** beautiful deciduous shade trees or hedging, 4m in 5 years (est) 30m, Fagus sylvatica purpurea attractive wine leaves, Fagus sylvatica, fresh green.

**Crataegus (Hawthorne)** Paul's scarlet, deciduous 3m in 5 years, est 6m very hardy displaying full clusters of dark pink flowers in November. **Ginkgo biloba:** Deciduous, colourful, unique foliage, Pest and drought resistant, mature height 13-20 m / mature width 12m, one for a shelter belt. **Magnolia starwars**, very fast growing NZ bred deciduous Magnolia with large leaves and huge waxy pink flowers, height 5 x 4 width in 10 years. **Magnolia grandiflora** - A very handsome evergreen tree with dark green glossy leaves with a brown under-felt. Height 8m / 4m width in 7/10 years. **Smaller gardens:** Gingo jade butterflies: unusual deciduous, dwarf slow growing vase shaped tree, jade leaves. 3m high 2m wide. Gleditsia emerald cascade: A very attractive weeping form, smaller growing making an ideal garden focal point. 2m high by 3m wide. **Michelia starbright:** Very pretty, fragrant, evergreen large Shrub with creamy-white blooms. Can be used for hedging or screening. Height 4m, width 2m in 7/10 years.

**Robinia lace lady:** A deciduous, very daintily branched small leafed tree, which will not grow heavy hard wood branches or roots and can be kept to the size required.

**Vegetable garden:** Keep planting Shallots, Buttercrunch Lettuce, Beetroot and Broad Beans, keeping water up until settled. Cover with frost cloth to protect from frost and birds when small.

**Fruit:** Tamarillos, if lucky enough to have these in your garden, they will be hanging like jewels from almost bare branches - such a treat at this time of the year. Because the plants do not make hard wood, they are frost tender but here on the coast in a sunny location they ripen and are ready to pick now. Tamarillos will grow from tip cuttings - a bush will last for a decade if protected during Winter and prefer to be outside - not in a glasshouse.

**Feijoas** are a treat right now as well - they do not ripen all at once, dropping from the bush when ripe. Lemon "Meyer" are cold hardy and will fruit all year. If planting a new bush, remove all flowers and small fruit for the first 3 years to get branch work established, then it will produce for years. Plant where they get afternoon sun, feed with citrus food in early Spring and early Autumn. NZ Cranberry (Myrtus ugni) ready now, have a taste combination of Strawberry, Pineapple and Apple - my Grandchildren pick and enjoy them whenever here. A small evergreen bush - very fragrant when fruiting - can be hedged. Cheers, Linda.

# OAMARU + PHARMACY

*It's your Pharmacy*

## Let's talk about the Benefits of the Vitamin D

Vitamin D is sometimes called the "sunshine vitamin" because it's produced in your skin in response to sunlight. It's a fat-soluble vitamin in a family of compounds that includes vitamins D-1, D-2, and D-3. Your body produces vitamin D naturally when it's directly exposed to sunlight. You can also get it through certain foods and supplements to ensure adequate levels of the vitamin in your blood. Vitamin D has several important functions. Perhaps the most vital are regulating the absorption of calcium and phosphorus, and facilitating normal immune system function. Getting a sufficient amount of vitamin D is important for normal growth and development of bones and teeth, as well as improved resistance against certain diseases. If your body doesn't get enough vitamin D, you're at risk of developing bone abnormalities such as soft bones (osteomalacia) or fragile bones (osteoporosis). Some of the more surprising benefits of vitamin D might aid against some diseases, also reducing your risk of multiple sclerosis. Vitamin D may decrease the chance of developing heart disease, and help to reduce your likelihood of developing the flu. Research has shown that vitamin D might play an important role in regulating mood and warding off depression. Consider adding vitamin D supplements to your diet if you're trying to lose weight or prevent heart disease. People taking a daily calcium and vitamin D supplement may be able to lose more weight than subjects not taking it. Many factors can affect your ability to get sufficient amounts of vitamin D through the sun alone. These factors include: Being in an area with high pollution, spending more time indoors, living in big cities where buildings block sunlight, having darker skin. (The higher the levels of melanin, the less vitamin D the skin can absorb.) These factors contribute to vitamin D deficiency in an increasing number of people. That's why it's important to get some of your vitamin D from sources besides sunlight. The symptoms of a vitamin D deficiency in adults include: tiredness, aches, and pains, and a general sense of not feeling well, severe bone or muscle pain, or weakness that may cause difficulty climbing stairs or getting up from the floor or a low chair, or cause you to walk with a waddling gate, stress fractures, especially in your legs, pelvis, and hips. Doctors can diagnose a vitamin D deficiency by performing a simple blood test. If you have a deficiency, your doctor may order X-rays to check the strength of your bones. If you're diagnosed with a vitamin D deficiency, your doctor will likely recommend you take daily vitamin D supplements. If you have a severe deficiency, they may instead recommend high-dose vitamin D tablets or liquids. You should also make sure to get vitamin D through sunlight and the foods you eat.

*Your Pharmacist will take you through some information and review if Vitamin D is right for you. Come and talk with us, at Oamaru Pharmacy the team is always ready to help you, with a smile and knowledgeable advice.*

## Apple and plum bran loaf

Grated apples and chopped plums make this bran loaf extremely moreish. It is perfect as a sweet bite for morning tea, so put a batch in the oven in the morning and enjoy freshly baked with a cup of tea.

### INGREDIENTS

1 cup wheat bran  
1 cup brown sugar  
1/2 cup apple, grated  
3/4 cup milk  
1 tbsp honey or golden syrup  
1 apple, finely diced  
2 ripe plums, finely diced  
1 cup plain flour  
1 tsp baking powder  
1 tsp vanilla

### METHOD

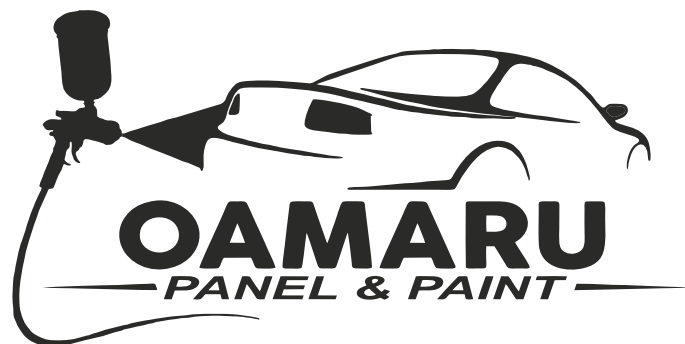

Soak the first five ingredients for 1 hour or longer. Preheat oven to 180°C. Line a standard loaf tin with baking paper.

Add the diced apple, plums, flour, baking powder and vanilla, stirring to combine.

Scrape into your prepared loaf tin and bake for 1 hour or until a skewer comes out dry. Leave to cool for 10 minutes before turning out to cool completely before slicing.

### NOTES

If you're not eating this within 1-2 days, store it in the fridge as fresh fruit can attract mildew. Blueberries work with the apples in this recipe too. Double the recipe and freeze one loaf for later if you wish.

### Waitaki Interiors - Keep the heat in this Winter

Window furnishings are a fabulous way to keep your home warm.  
If you want drapes or blinds for winter there's still time, and we  
currently have 15% off all Luxaflex blinds.

A personal favourite of mine – also dubbed “the designer  
alternative to double glazing” Duette shades are the original  
cellular shades, engineered to provide beauty as well as offering  
levels of energy efficiency in both warm and cold climates. Made  
of pleated, reinforced fabrics bonded together and joined to form  
compartments that trap air, Duette® Shades' honeycomb structure  
creates insulation that can help lower your energy consumption and  
energy bills.

The 20mm Duette is the choice of more style-conscious customers  
and has been developed more recently than the 10mm Duettes.  
The Architella® Duettes incorporate a cell within a cell creating 3  
separate air pockets. A products 'R-value' is a measurement of its  
ability to resist heat flow. An inside fitting Blockout Duette®  
Architella® Shade can increase the R-value of a 3mm single  
glazed window from 0.127 to 0.775 reducing heat transfer by 83%.  
They may look delicate but Duette fabrics are made from a  
remarkable and very hard-wearing material called spun-bonded  
polyester. This modern environmentally friendly material is 100%  
recyclable. This fabric is very robust and hard wearing as well as  
anti-static so it inherently resists dust. Luxaflex firmly believe in  
Kiwi Made and their blinds are thoroughly tested and rigorously  
quality controlled. Duettes® are ideal for skylights, sloping  
windows or hard to reach windows.

I find Duette® Shades aesthetically pleasing, their linear shape  
looks crisp and clean and the honeycomb profile creates interesting  
shapes with tones of highlight and shade on the blinds themselves.  
They also offer a Day-Night option which provides two shades in  
one with the ability to have both a sheer and full blackout fabric in  
one blind, now without a visible moving rail for a seamless  
integrated look. I'm Sherry from Waitaki Interiors, give the team a  
call if you have any questions. Phone 03 434 7755

### **School Caretaker**

Are you what we are looking for?

We need a self-motivated "Jack of All Trades" to join our team at Weston School to take care of our grounds and building repairs and maintenance. You must be reliable, have good time management skills and flexibility to work alongside staff and pupils in a busy school environment.

This is a permanent part-time position, 20 hours per week, Term Time only with extra hours over the holiday breaks.

If this sounds like you please make contact for a job description, application information or any other questions.

**Contact:** Joy McGee, Executive Officer
