Issue 505

People are talking about how great the "Farmers Market" is. If you have not been yet - why not? We would recommend going and taking a look - it's at 9:30-1pm every Sunday, cnr Wansbeck and Tyne Streets.

Keep the Children busy over the School Holidays - mow the laws, weed the garden, 'do the laundry and it must be time for some Spring cleaning...

A reminder for Garage sale adverts - you need to think a week ahead of your event, as our deadline is Thursday for the next week's issue due out on Tuesday.

Until next week, Regards the Telegram.

Changez have vacant spaces for the 20/21 mowing season.

It is all on now with weeds... while they are small, my most used tool is a hoe to keep them from taking hold - especially chick weed and biddy-bid which is worked on here to eradicate, every Spring - so have no idea why as many seed from both still germinate everywhere! A hoe will not work with Couch grass and Convolvulus -

this needs to be dug out while ground is soft and runners can be taken right back under the ground to where they begin, it is very satisfying to know they will not grow back if pulled all the way out. I spot spray in badly affected areas while surrounding are low, but never where food is grown.

Keeping the light off bare soil with mulch will stop annual weed seeds germinating. Compost, un-sprayed grass clippings, (only thick enough to block light) Pea straw, that great Mulch, which looks like soil from Pukeuri freezing works,(around established plants) and the well cooked mulch from the Waitaki Resource Recovery park, will all do the trick in orchards and rough garden areas. Mulching is also the answer to holding moisture in the ground.

Garden edging with Perennials is another way of covering the soil and a way to stop birds scratching soil out over paths, If you are looking for a pretty mat forming garden edge and have a clump of Cat Mint beginning to make new growth, dig the clump up and break into many new pieces with roots and pot them up. When roots fill pots, they are ready to be planted as a front edge. This can also be done with Lamb's Ear, Erigeron Daisy, Violets, Sage, Mono grass and Armeria (thrift)

Feeding plants. If you have not fed plants or Shrubs - do it now.. There are balanced plant foods for all types of plants on offer now for this time of the year... Slow release granules, powdered plant food (watered in), Blood and Bone. Manure enriched compost rich in nitrogen should have been added to gardens in late Winter... too much nitrogen given now, will encourage over lush growth. However, I often mention using old stable manure around Roses to keep them going over their long flowering period - don't dig the manure in as this can cause root damage - watering will take it to the roots as required. Extend food just beyond the drip line where the most active feeding roots are. Having saved a lot of Sunflower seed from last year's flowering, they were planted two weeks ago and are now up and doing well. I just love seeing those big happy flower faces en-masse following the sun. They will be planted out in groups to stand high behind existing Shrubs and any sunny bare areas that need brightening up. I have been noticing a few Cherry Blossom trees with root stock branches being left to grow. By this I mean, any branches that develop below the graft (where the branches begin at the top of the trunk); these should be cut off while still small. If allowed to develop into branches, they will take over the whole tree. All Flowering Cherry trees are grafted onto a strong root stock of a very ordinary white blossom tree, so if you have a tree with lovely pink or white blossom and you notice some blossom looks different, then most likely it will be a branch growing from below the graft - cut it right out

Lawns: The buzz of lawn mowers is in the air again - cutting too low will let light in for weeds to grow. Let them thicken up, as they need to be strong to cope with oncoming Summer heat. Grass seed I planted a couple of weeks back has struck, letting me know the ground is warm enough for re-sowing more bare patches.

Vegetable garden: Lots to do in the veg garden right now... I have been madly sowing seeds over the last few weeks and it's now the time-consuming pricking out to be done - just as well days are longer now with daylight saving. All salad veg can go in along with, Potatoes, Peas and Carrot seed, Tomatoes, Pumpkin and Courgette plants will still need protection at nights until frosts are over then the ground will be warm enough for Runner and Dwarf Beans. My Broad Beans came through the Winter well and have started to Bean. It is wonderful have an abundance of choice again and to be picking our own fresh produce. Ever considered including a raised veg garden to plant up? This can be achieved easily by contacting Aly & Sophia at Hapori o te Ao on 021 044-8209 or at uno.mundo@gmail.com. they will come and measure up then give a quote. **Fruit:** It's all up to the bee's now. *Cheers, Linda*

Jenny Wang - Registered Clinical Dental Technician (P.G.Dip. C.D.T.)

Monday to Friday... 9am to 5pm 4/6 Coquet Street, Oamaru. Ph 03 434 7560.

oamarudentureclinic.co.nz

We would like to Introduce Jenny.

We would like to Introduce Jenny. Jenny completed her schooling in Canterbury, and then lived in Dunedin where she attended Otago University and successfully completed a Bachelor of Dental Technology in 2008 and a post graduate Diploma in Clinical Dental Technology in 2011.

Jenny worked abroad and in other regions of

NZ before moving to Oamaru to work under the late Ken Scott Dentist. Jenny showed excellence in her technician skills and grew in this area of her work as a Clinical Dental Technician. Jenny is our only local operating Clinical Dental Technician and with her husband Frank (also a Clinical Dental technician) together they own and operate their Dental Clinic in Oamaru, Oamaru Denture Clinic on Coquet Street and South Canterbury Denture Care in Timaru, and more recently an Auckland Branch too. Jenny is always looking at smarter new ways of producing high quality Dentures and believes a pair of well fitted Dentures will improve your overall health.

We welcome new clients and offer 5% Discount to all Gold Card Holders.We also Offer Free Denture Cleaning to our community residents every Wednesday.

Like us on Facebook, www.oamarudentureclinic.co.nz Common Question

 $\ensuremath{\mathbf{Q}}\xspace$. How should I clean my dentures?

A. We recommend brushing your dentures using a soft denture brush and warm soapy water. Any liquid soap or mild detergent is suitable or soak them in a cleaning solution. Do not use toothpaste or a course brush as these may scratch the denture. We recommend weekly use of a heavy-duty cleanser, like Caldent, to remove stains and any calcium build-up, which we have in store along with New Zealand made Luxident denture brush.

Free Cleaning instore every Wednesday using our New Denture Laundry cleaner.

03 4330725 or see us at 224 Thames Street, Oamaru

T&C Deposit on fire before 30 October 2020 and Installed before 30 March 2021. Excludes out door fires. Not in conjunction with any other offer. For full terms and conditions please email Heat@hiflo.co.nz

At this September's election, you will be asked if you want the End of Life Choice Act (EOLC Act) 2019 to come into force.

This Act is not about turning off life support, do-not-resuscitate requests, or allowing someone to refuse medical treatments (These are already legal in NZ). The EOLC Act is about giving doctors and nurse practitioners the legal power to assist in patient suicides, or to end the lives of their patients with lethal injection/dose upon request.

8 REASONS TO VOTE NO:

- There is NO reliable safeguard to prevent someone being pressured into euthanasia or assisted suicide (one doctor is simply required to 'do their best' to detect pressure, and they can only speak to people that the patient lets them speak to).
- 2. NO independent witness is required at any point in the process even at the time the lethal dose is injected/taken.
- **3.** There is NO protection against **secret euthanasia or assisted suicide** (family do not have to be consulted, or even informed).
- 4. There is NO requirement to ensure that the person is **mentally** competent on the day the lethal dose is injected/taken.
- There is NO protection for terminally ill people who are also depressed or mentally ill.
- 6. There is NO required cooling-off period before the lethal dose is prescribed.
- 7. There is NO protection against **medical errors** about the course of an illness or how long a person has left to live.
- 8. More than 200 lawyers and over 1600 doctors have publicly denounced this Act as bad law.

From the 3rd of October 2020 **VOTE NO** to the End of Life Choice Act.

I-Deal Furniture & Appliances

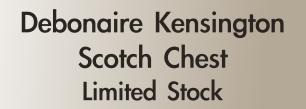

We are a licenced second hand dealer with the best range of quality secondhand furniture and appliances, we are registered WINZ supplier. We like to bring modernisation and service to the secondhand industry something I feel is lacking. I have worked in the retail industry for over 20 years and have worked in big supply chains like Smiths City and Harvey Norman. I wanted to have a secondhand shop that provides a service and customer focused environment. Since opening 8 years ago I have built strong relationship in Oamaru as the preferred whiteware supplier as I have the largest range. All items are tested cleaned to the highest standards, some ask if they are new!! I also pride my self in having a very good success rate. I am very picky on the items I sell so my breakdowns or faults are minimal almost non existant. Have a great week, Nathan.

OAMARU + PHARMACY It's your Pharmacy

Let's Talk About High Blood Pressure

Imagine you are trying to water the garden with a narrow hose and the tap turned full on, the pressure build-up will be so great that the force of the water will blow your plants out of the soil. Similarly, if you have narrowed arteries or increased blood volume, blood pressure increases. Hypertension is persistently raised blood pressure and can exacerbate cardiovascular disease and cause damage to small blood vessels in the kidney and eye, leading to loss of kidney function or vision. It affects mainly the over 50s but can also be a problem in younger people, and one in five New Zealanders will have high blood pressure at some stage. Primary or essential hypertension is by far the most common form of high blood pressure. It seems likely that it's caused by several factors combining together such as a genetic tendency, increased salt intake and obesity. Other conditions cause secondary hypertension such as kidney disease, diabetes or pregnancy (pre-eclampsia). Often there are no signs or symptoms, it creeps up silently until you have a serious problem and start getting nosebleeds, headaches, dizzy spells or have a stroke. So get regular checks and never ignore symptoms. The best way to keep your blood pressure down is to make sensible lifestyle choices by being active, eating a balanced, nutritious, low-fat diet, lose excess weight, control your stress levels and avoid known triggers such as salt, smoking and alcohol. The only sure way to know if you have high blood pressure is to have your blood pressure measured. If you have several blood pressure measurements on different days that are higher than normal, you should be checked for signs of cardiovascular disease by a medical professional. Even if you are taking prescribed medicines to lower your blood pressure there are some natural supplements that may help. Garlic may help thin the blood and avoid complications of hypertension. Coenzyme Q10 is an antioxidant and there is some evidence that it may bring down blood pressure. Fish oil is good for keeping cholesterol down and may help with blood pressure. You can find these products in-store, we are happy to help choose what is right for you.

At Oamaru Pharmacy we offer FREE blood pressure checks. Come in and see us, the team is always ready to help with friendly and knowledgeable advice.

Realfood Pantry - Dried Fruit

Colourful fruit is nature's way of providing us with beneficial antioxidants, rich in Vitamins A, B1, B2, 83, 86 pantothenic acid and dietary minerals of calcium, iron, magnesium, phosphorous, potassium, sodium, copper, manganese and phytonutrients. These help us look & feel great and are natural defences against free radicals that result from factors such as pollution, smoking, alcohol, respiration, metabolism and inflammation, When fresh fruit is not available, impracticable or out of season, dried fruits are the best alternative.

Blueberries: a rich purple colour, contain high concentrate of anthocyanins & unique phenol-like antioxidants offering a whole body antioxidant support

Cranberries: high levels of Vitamin C, believed to play a major role in fighting disease-causing elements. Kept on board ships in the early 19 century to help fight off scurvy.

Figs: high in fibre & excellent source of flavonoids & polyphenoids. A highly perishable fruit hence a dried fig is the most convenience way to enjoy.

Apricots: rich in betacarotene & lycopene, a source of Vitamin A, C & E & low in calories. Recognised for benefits in general health & wellbeing & ranked as among the world's healthiest food.

Mango: a great source of vitamins A, E, C betecarotene & selenium. This rich fleshy stone fruit is king of fruits grown in tropical climates.

Raisins & Sultans: a source of polyphenol, phytonutrients, resveratol, oleanolic & selenuim. This fruit is from a grape and is often overlooked for its goodness properties.

Get behind Jill for Alzheimers Awareness

There will be no Memory Walk this Year due to covid. Therefore, Jill Macrae has decided to take up a personal challenge to fundraise for the Move for dementia campaign. Jill is 67 years old, has cerebral palsy and a leaky heart valve. She helped to support her Mum who was diagnosed with dementia before her Mum finally moved into a care home last year. Jill is going to attempt to walk with her walking frame from her home in Taward Street to the New World Waitaki Supermarket. This will take place on Wednesday 30th September at 10am. Alzheimers Otago have started a fundraising page for Jill and we are urging the local community to get behind her & show their support. There is a direct link to enable people to do this online. Go to Alzheimers Otago website and follow the "Move for Dementia Link" and tap in Jill doing it for dementia. Alternatively, you can donate directly to the Oamaru Service; 27 Coquet Street or ring Debbie 4349090. Every donation helps no matter how small. We believe this is a heroic effort on her part and we would like to make it worth her while..... GO JILL!

New SPRING RANGE of MM Linen in store now!

M.M. Linen are creators of elegantly designed and crafted bed linen and homeware. Timeless collections that will drape your home in sophisticated luxury. Made with care using the highest quality suppliers and fabrics, inspired by the rich and lush colours of beautiful gardens, which are paired with the soft palette of nature. Botanical and floral prints hand-painted by our artists. These are complimented by a wide range of velvet comforters, throws and euros to layer the bed and create a simply stunning haven. We love the beautiful vintage bedrooms of Europe where bedspreads are very much a part of classical style. From simple pure linen, to intricately embroidered cotton and velvets, the room collections are romantic, soft & dreamy. Over 100 different M.M. Linen cushions compliment the range with stunning prints, a variety of organic and luxe fabrics, and crafted features of embroidery & tassels. Inspirational grouping of a wide range of plain velvets in stunning colours tie back with the patterns. Blankets and throws match back with the entire range in a mix of fabrics and textures including pure NZ wool. Come in and have a chat about how to make your home beautiful with MM Linens variety of Throws, Bedspreads, Comforters,

Sheets and Cushions we look forward to seeing you soon. Waitaki Interiors - 29 Thames St.

Havenwyck Pets- Dog Walking

Great weather and longer days mean more dogs are out and about walking, enjoying the freedom spring brings. We may think that all these dogs are friendly however some dogs can be anxious when out on a walk. When we have our own sociable dogs with us there are things we can do to help other owners! The biggest help is communication! Before we even get right up close lets talk, say hello, ask; "is your dog ok with us approaching"?

With us communicating we can ensure we have a positive interaction with other dogs, if the dog is not ok with us lets cross the road, gain your dogs attention or turn and walk the other way. Once we have our dogs attention it takes the pressure off a negative dog/dog interaction. Practice at home saying your dogs name, when they look at you reward with a tasty treat or play with a toy; this reduces the need to be pulling on the lead.

A positive dog/dog interaction whilst out and about is a nose sniff, butt sniff, then walking away. When your dog does this, reward! Keep playing to safe, off leash areas. Remember the walk is for the dog! Lots of sniffing and discovery to be had while exploring the neighbourhood, a nice loose lead and a treat pouch is all you need to have a positive enjoyable walk with your dog.

Kind Regards, Leanne Wreakes-Fallen DipVN
